

Hi! Thanks much for viewing this page. I appreciate your taking time with me and reading this article. I have seen a number of books on how to earn money, and probably you have read tons of them. I will not say here that, these methods will earn you billion, or \$1000/day. But with this method, I have seen many internet gurus, earning even \$5000 a day. Everything actually depends on your efforts and nothing will be much until you try. When you are reading this report, please remember that you will need at least:

1. Basic html knowledge. If you face any problem with any understanding of html, just go to [w3schools.com](http://w3schools.com)
2. Some bucks (:p I know this hurts)
3. At least 2-3hours per day

So, what do you think? Shall we move on? Cool! I am glad that the report is in right hand!

Just one request, please do not copy and paste and use this as your content. If you want to use it on your sites, please mention my affiliate links at the bottom at least. LOL

### **Step no. 1 (Find a good niche) :**

I won't describe how to find a good niche, cause you probably have learned about that a lot. If you yet have any problem, do SEARCH!

Then if you are trying to create your own product, WAIT!

Start creating your product, no worries, it is really good. But before that, try being an affiliate of a product that meets your product category, so that you can understand how to promote it with success and earn more. So basically start with an affiliate product. Find a good one, because you will be spending some bucks on it. So BE CAREFUL!

### **Step no. 2 (Buy a domain or find a free subdomain from free hosting)**

A domain name? Hm, you shall use one, but the main thing is, you might not need to buy a domain name actually. You can also do things in a free hosting. There are so many free hosting those will let you open an subdomain with some good space. Remember, we will need those hostings only who will provide no advertisement. Cool? But I RECOMMEND

BUYING DOMAIN. Host that on free hostings. If you think there will be much more traffic, then buy a hosting. Now lets move on to next step.

### **Step no.3 (Install Wordpress)**

You are hearing me right. Wordpress! Why wordpress?

1. It is super easy to use
2. Lots of plugins, themes and tutorials for free
3. Guess what, almost all the internet marketers use wordpress
4. Super great for SEO (if you do not know what is SEO do SEARCH!)

### **Step no.4 (Create 5 articles on Wordpress)**

People will be telling you to buy them from gigs sites like fivrr. Well you can do that. But I recommend CREATE YOUR OWN. Even if it has bad English, do NOT worry. Write more! Publish them on wordpress site. On homepage, have the best one. This is the one that will convert the general visitors to attracted visitors. Others are just to show that the site is being updated every day and that it is not a pyramid that is lying there for hundreds of years LOL.

On the first page also make sure you mention that you have an exciting gift for them after they opt in! Have you done that? Ok great! Now let's move to the next part.

### **Step no.5 (Create a video)**

This is your secret weapon. Create a video. Do NOT hire somebody to create a video. Create on your own. If you are afraid of your fluency or pronunciation, forget that. I have seen some Chinese English (!) on videos which are converting HUGE! Create the video on your affiliate product. DO NOT ACT WEIRD, DO AN HONEST REVIEW. Mention:

1. The positive things
2. The negative things
3. The attracting things

After you are done, upload that on youtube. Make the video unlisted. Do not publish that. DO NOT.

Put that on a secret page. We are going to the right way!

#### **Step no. 6(Create an ebook)**

Do not be afraid. You won't be writing Twilight Saga LOL. All you will do is, create the ebook with what you say in the video. Upload the file on dropbox. (NOT ON MEDIAFIRE OR SITES LIKE THAT). On the ebook, have your affiliate link! DON'T FORGET TO DO THAT.

#### **Step no.7 (Lets edit the hidden page a bit)**

Right now you have a video on the hidden page. Add the ebook underneath the video too. Name that something fancy. Have an attractive image for the ebook. So by now you shall have these on the hidden page:

1. Video you created
2. The ebook

This is VERY IMPORTANT. Right under the video, and right on the top of it, place your affiliate link. Make it a text link that looks like "Click Here to Know more". Or you can be more creative at this. You can create a delayed event (or call to action, SEARCH IF YOU DON'T UNDERSTAND) that will appear at any time you want. It is more converting. There are a lot of javascripts that do the delayed event.

## **Step no.8 (Sign up for mailchimp)**

Mailchimp is an autoresponder. If you do not know what it is DO SEARCH. You can use any autoresponders. Sign up for mailchimp. Create a list. Generate a webform. Place the webform on the first page of your site. It shall be right under where you say "exciting gift after optin". After they sign up, send them email with the hidden page link. In the email do NOT forget to thank them :D

## **Final Step**

Now the part that will cost you money. You have gone this far. Now you want visitors to the site. How will you get that? There are couple of ways.

1. Pay per click
2. Pay per impression
3. Email marketing
4. Link building

We will go with both pay per impression and link building. Link building is something I won't discuss here. But you will need to do that. DO SEARCH!

Probably I am terming pay per impression wrong. But this probably makes sense for the newbies. We will spend money on facebook. On facebook, create a page with your affiliate product name. make the name look great and attractive. Fill in the page with the gist of your wordpress blog. Also share your views, daily status. Have your friends like the page.

Now search for facebook coupon on fivrr.com. You shall find many. Buy one from somebody with good feedback. Look for 50\$ coupons at least.

Come back to your facebook page. Create advertise and use the coupon code. Spend 3-5 dollar each day. Change the campaigns frequently to see which one is converting. After you find that, change the campaign to the converting one. And that is it. Do not spend more than 50 dollar in the first attempt. If you do not see any sell, review if you missed any step.

Believe me, these simple steps earned money for a lot of internet marketers. There are different methods of doing the same things. You can be creative at that.

In my opinion, to be a successful internet marketer, you must start with at least \$500-\$1000. You probably can do without an online coach. But it wouldn't hurt to take expert advice, will it? ☺

Thanks much again for reading this, I really appreciate ☺

Below are some of the products you can try, they are really cool! (With my affiliate links of course :D)

1. [Fbinfluence](#): A great product if you are new to the world of facebook marketing
2. [PPC-Coach](#): They have some real good materials. You can buy their trial product for 1dollar only
3. [Ipage](#): Ipage just rocks!
4. [Hostgator](#): But they have the best services.
