

I like the originality here. There is too much dead space/the design feels unbalanced when adding in the name of the app.

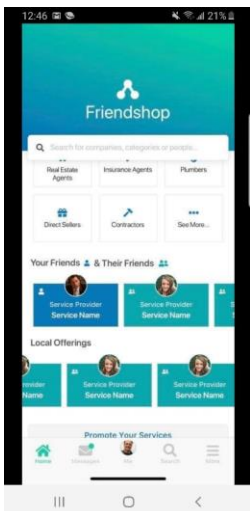

Great color gradient. I like the interaction. I need more "business transaction" vibe. Less of a dating service vibe?

Good use of space. Well balanced. This comes off a little too "dating app" and isn't as business transaction oriented.

Feel free to take colors and think on ideas from the App's home page:

Please ask questions through the thread.

We are looking for fresh, modern, clean, well balanced ideas!

Additional inspiration preferred by my client:

Dandelion -they like the interwoven aspect and the symbolism it represents.

-mandala (clean interwoven symbol)

-drop of water with a ripple effect

-eternity symbol
