Report

This report is just a speck of what I learnt with a great Traffic Generator E-Book I found with heaps of valuable information. It has sold over 1000 copies and has a TON of reviews.

On-Site SEO involves manually optimizing every page on your website, from its title tag, keywords used within content to the way that your site map or overall structure is created.

All of the work of on-site Seo takes place directly on your website, and is in your full control.

When it comes to on-site SEO, there are very important factors regarding the actual structure and anatomy of your website that you need to pay special attention to in order to effectively optimize your website for top search engine rankings

Keywords

Title Tags (per page)

Meta Description

Site Map Inclusion

Title Tags:

A title tag should include a description of what your website is about, rather than just including your website's URL, you should always incorporate your primary

keyword phrase into the title tags of each webpage you own.

Head Tags:

Header Tags also play an important part in search engine optimization, because by using head tags within your website's content, you are able to highlight important text on your website, ensuring that search engine spiders pay special attention to the text contained within these head tags.

Site Maps:

Another very important element to SEO is including a site map on your website. What a site map does is helps both visitors and search engine spiders navigate their way throughout your pages and categories, by outlining all of the different areas of your site.

You can create a sitemap very easily by using free services such as:

<http://www.XML-Sitemaps.com>

Keywords:

When it comes to developing your content so that you are optimizing your website for the search engines, you should pay attention to keyword proximity, prominence as well as the order of your content itself.

The prominence of your keyword is based on the first instance of where it appears within your content.

A keyword phrase that is used at the end of your content will be considered less relevant than a keyword phrase that appears in the first portion of your content or article.

This means that you need to ensure that you implement your primary keyword phrases into the first half of your content, so that it is given more weight when search engine spiders index your website.

Keyword proximity is also very important in terms of search engine rankings because it indicates to the search engines that these keywords are related to one another.

With off-site SEO, you are focusing on building solid back links to your website, as the more incoming links to your site from quality, relevant websites, the more authority your website is given in the search engines.

Place emphasis on the quality of your incoming backlinks rather than the quantity of backlinks you have. While the more backlinks in circulation, the better, if you have more backlinks coming in from solid, established and authority websites, they WILL carry more weight than those pointing to your site from start-up websites and blogs.

You also want to try to create a backlink campaign that has ONE WAY backlinks, where you are not required to provide a reciprocal link, as it will add more value to the backlinks pointing to your site.

Directory Backlinks:

With online directories, you can add your website into specific categories and instantly establish back links to your website, just be careful not to over-do it!

Social Bookmarks:

Here are the top 10 social bookmarking websites for generating fresh back links to your site. All of these contain DO follow, ensuring links leading to your website will count within the search engines as a valid back link:

- 1 - <http://slashdot.org> (PR9)
- 2 - <http://digg.com> (PR8)
- 3 - <http://technorati.com> (PR8)
- 4- <http://www.furl.net> (PR7)
- 5 - <http://www.backflip.com> (PR7)
- 6 - <http://www.hugg.com> (PR7)
- 7 - <http://www.mixx.com> (PR7)
- 8 - <http://ma.gnolia.com> (PR7)
- 9 - <http://www.connotea.org> (PR7)
- 10 - <http://mystuff.ask.com> (PR7)

Blogging For Backlinks

To determine whether a specific blog will count as a link back, you can download the free Firefox plugin at: <http://www.quirk.biz/searchstatus/>

It's also important to use anchor text within your blog comments, especially if you want to rank for various keyword phrases.

When it comes to generating back-links with blogs, you need to:

- 1) Find blogs that provide a 'do follow' (the only kind of blogs where a link back to your site will count as a "vote".)
- 2) You explore and read the blog and then you make an insightful, useful or relevant comment to the post that is likely to be approved by the blog's administrator.
- 3) Include your back-link with relevant anchor text on the blog.
- 4) Rinse & Repeat

If you are looking for some legitimate and powerful traffic generation method, I recommend this eBook. This eBook is written by a seasoned internet marketer and help you to generate loads of traffic.
