As many of you know we have been writing a lot about **Social Networking** and **Social Bookmarking sites**. It is essential to get links to your site. Any kind of link helps but the best kind of link is a one way link that points to your site and doesn't require you to reciprocate which what this list is all about. The higher the page rank of the site linking back to you the more valuable the link to your site will be. The following list was originally found at [WEB 2.0 Revealed web site](#) and details what each **Social Site** does as well as the page rank. Use them all or use a few that you haven't heard of. Check them out and see if your topic fits the site. Remember the more links you have the more popular you site will become. Provided, you are creating good content for your target audience.
